

Tutoriel 3

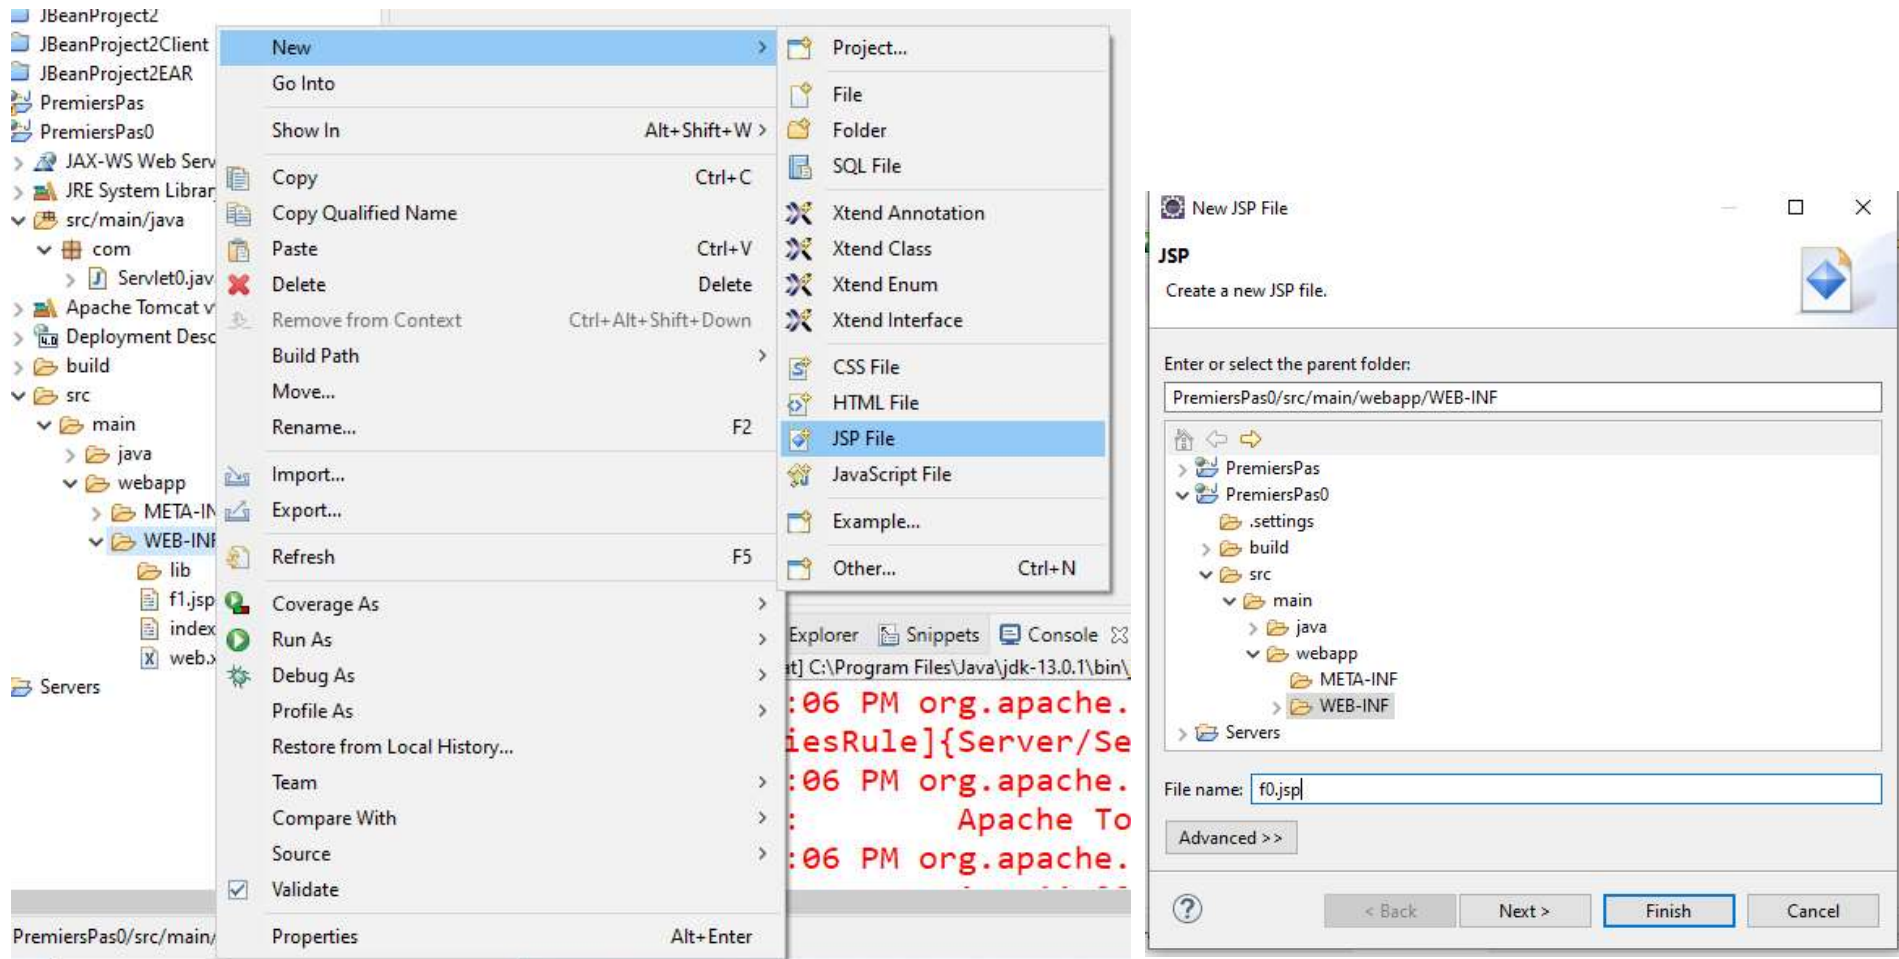

PREMIER PROJET MVC

Tutoriel 3 : MVC

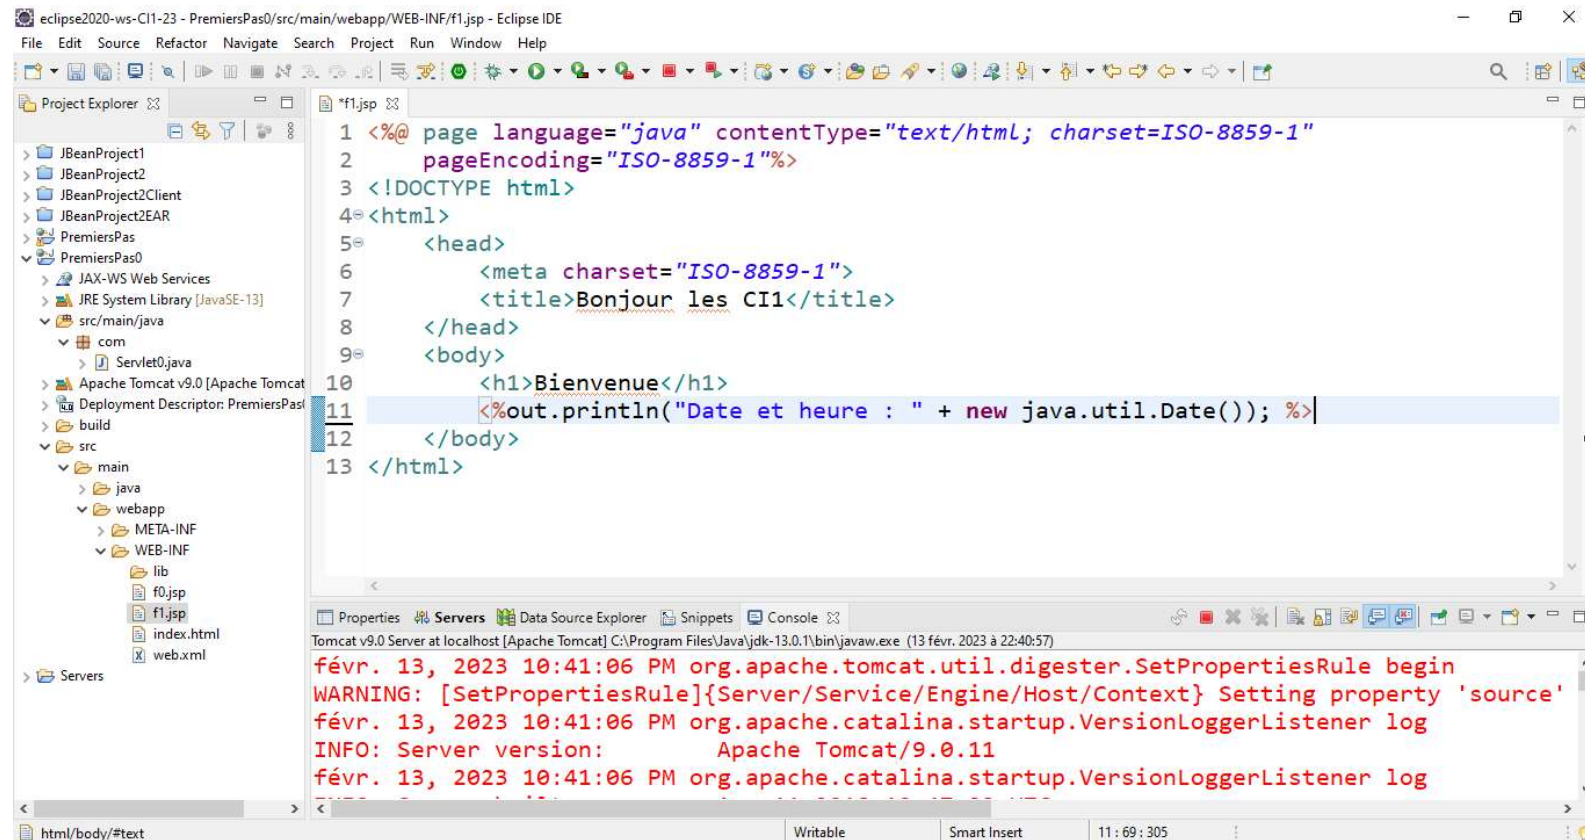

Tutoriel 3 : Séparation entre la vue et le contrôleur

- Créer un fichier JSP sous « src/main/webapp/WEB-INF »

Tutoriel 3 : Code de la JSP

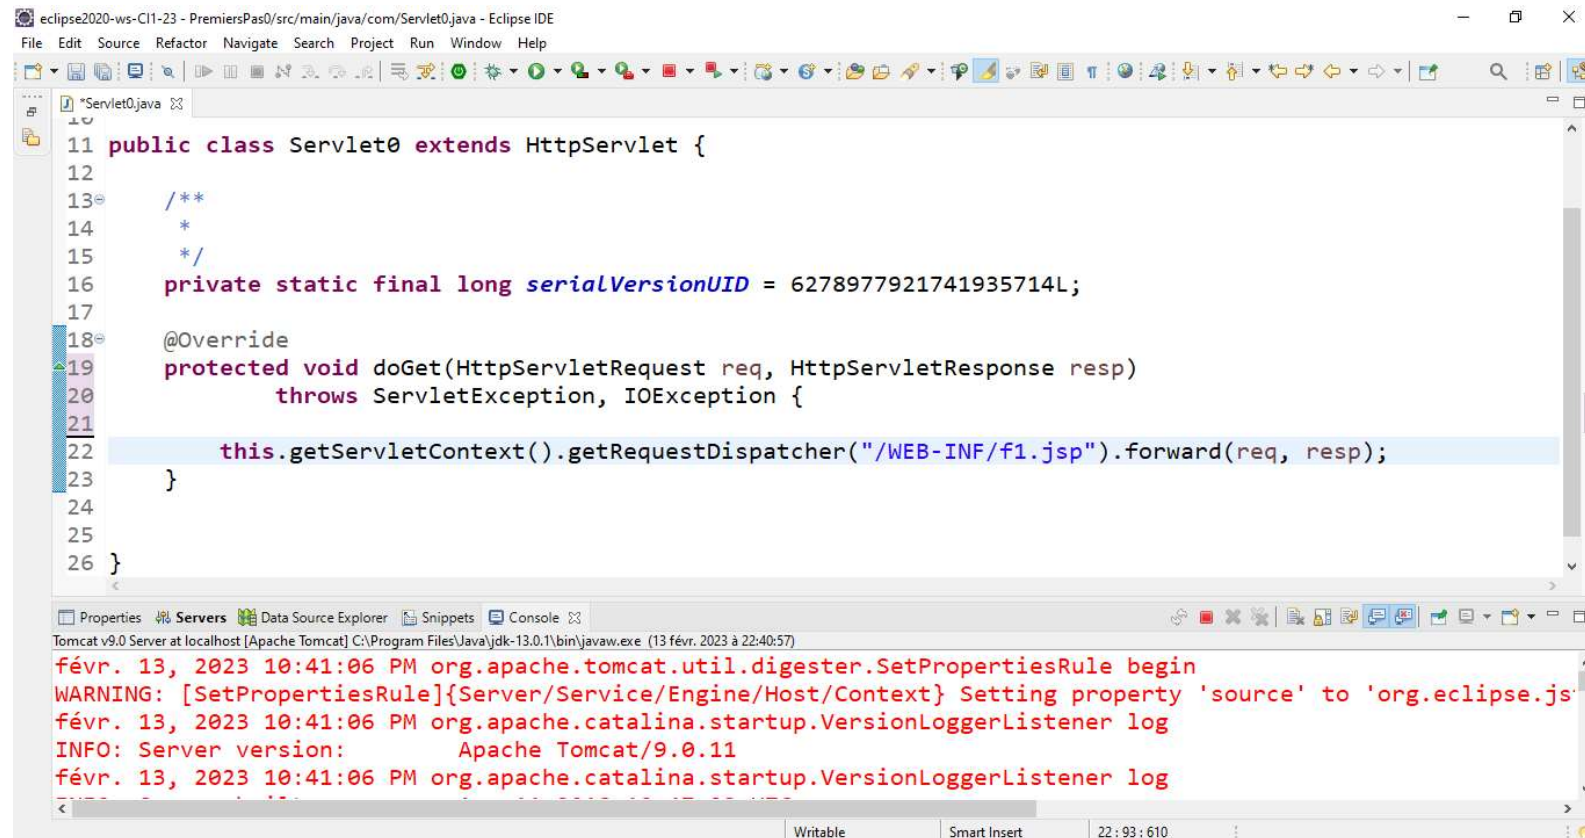

The screenshot shows the Eclipse IDE interface. The Project Explorer on the left displays a project structure with folders like JBeanProject1, JBeanProject2, JBeanProject2Client, JBeanProject2EAR, PremiersPas, and PremiersPas0. The main editor window shows the code for f1.jsp. The code is as follows:

```
1 <%@ page language="java" contentType="text/html; charset=ISO-8859-1"
2   pageEncoding="ISO-8859-1"%>
3 <!DOCTYPE html>
4 <html>
5   <head>
6     <meta charset="ISO-8859-1">
7     <title>Bonjour les CI1</title>
8   </head>
9   <body>
10    <h1>Bienvenue</h1>
11    <%out.println("Date et heure : " + new java.util.Date()); %>
12  </body>
13 </html>
```

The bottom console window shows the output of the Tomcat v9.0 Server at localhost [Apache Tomcat] C:\Program Files\Java\jdk-13.0.1\bin\javaw.exe (13 févr. 2023 à 22:40:57):

```
févr. 13, 2023 10:41:06 PM org.apache.tomcat.util.digester.SetPropertiesRule begin
WARNING: [SetPropertiesRule]{Server/Service/Engine/Host/Context} Setting property 'source'
févr. 13, 2023 10:41:06 PM org.apache.catalina.startup.VersionLoggerListener log
INFO: Server version: Apache Tomcat/9.0.11
févr. 13, 2023 10:41:06 PM org.apache.catalina.startup.VersionLoggerListener log
```

Tutoriel 3 : Modification de la servlet

The screenshot shows the Eclipse IDE interface. The top part displays the source code of `Servlet0.java`, which extends `HttpServlet`. The code includes a `serialVersionUID` and an overridden `doGet` method that forwards the request to `/WEB-INF/f1.jsp`. The bottom part shows the Tomcat v9.0 console output, indicating a successful startup of the server at localhost.

```
11 public class Servlet0 extends HttpServlet {
12
13     /**
14      *
15      */
16     private static final long serialVersionUID = 6278977921741935714L;
17
18     @Override
19     protected void doGet(HttpServletRequest req, HttpServletResponse resp)
20         throws ServletException, IOException {
21
22         this.getServletContext().getRequestDispatcher("/WEB-INF/f1.jsp").forward(req, resp);
23     }
24
25
26 }
```

Tomcat v9.0 Server at localhost [Apache Tomcat] C:\Program Files\Java\jdk-13.0.1\bin\javaw.exe (13 févr. 2023 à 22:40:57)

```
févr. 13, 2023 10:41:06 PM org.apache.tomcat.util.digester.SetPropertiesRule begin
WARNING: [SetPropertiesRule]{Server/Service/Engine/Host/Context} Setting property 'source' to 'org.eclipse.js
févr. 13, 2023 10:41:06 PM org.apache.catalina.startup.VersionLoggerListener log
INFO: Server version:      Apache Tomcat/9.0.11
févr. 13, 2023 10:41:06 PM org.apache.catalina.startup.VersionLoggerListener log
```

Tutoriel 3 : Tester le projet
